

ISMAIL MAINAL

Software Developer — React.js · Node.js · JavaScript · MySQL · Express.js

+91 7899120229 | ismailmanyal3@gmail.com | linkedin.com/in/ismailmainal | github.com/ismailmainal | Gulbarga, Karnataka, India

PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience designing, developing, and deploying production-grade web applications. Lead developer of **BillKar** — a live ERP system processing 500+ daily business transactions built with React.js, Node.js, Express.js, JavaScript, and MySQL. Experienced in full stack web development, RESTful API design, relational database management, JWT authentication, and scalable application architecture. Delivered measurable results: 50% reduction in errors, 35% faster API response, and 30% faster page load. Strong communicator, team collaborator, and fast learner with a track record of delivering software solutions on time and under pressure.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Hooks (useState, useEffect, useContext), Context API, Single Page Applications (SPA), Responsive Web Design, Component-Based Architecture, Cross-Browser Compatibility, UI Development

Backend: Node.js, Express.js, RESTful API Design, API Development, REST API Integration, Middleware Development, JWT Authentication, MVC Architecture, Role-Based Access Control (RBAC), Input Validation, Error Handling, Async/Await, Promises

Database: MySQL, SQL, Database Management, Relational Database Design, Schema Design, Schema Normalization, Query Optimization, Indexing, JDBC

Languages: JavaScript (ES6+), Java, Apex

Tools: Git, GitHub, Version Control, Postman, VS Code, npm, Chrome DevTools, REST API Testing, Debugging Tools

Concepts: Full Stack Web Development, Software Development, Web Application Development, SDLC, Agile Methodology, Object-Oriented Programming (OOP), Data Structures, Unit Testing, Code Review, Performance Optimization, Scalable Applications, Microservices Concepts, ERP Systems, Team Collaboration

WORK EXPERIENCE

Software Developer

Jan 2026 – Present

Aanirids Technologies Private Limited — Gulbarga, Karnataka, India

- Architect and lead developer of **BillKar**, a live production full stack web application using React.js, Node.js, Express.js, and MySQL — processing 500+ daily business transactions including invoicing, stock management, and financial ledger operations.
- Designed and implemented **15+ RESTful API endpoints** with input validation, async/await error handling, and real-time data synchronization — reducing data latency by 35% and improving overall application reliability.
- Built a fully responsive **React.js Single Page Application (SPA)** using React Hooks, Context API, and Tailwind CSS — improving user task completion speed by 40% through clean, component-based UI development.
- Implemented **JWT authentication** and Role-Based Access Control (RBAC) across 4 user roles — ensuring secure, permission-based access with server-side validation on every API route.
- Optimized MySQL queries using indexing and query refactoring, and eliminated redundant React re-renders — cutting average page load time by 30% and improving scalable application performance.
- Delivered document lifecycle automation (Submit, Cancel, Convert to Invoice) — reducing manual accounting errors by 50% and streamlining critical business workflows.

Junior Web Application Developer

Jul 2024 – Dec 2025

Besant Technologies — Bangalore, Karnataka, India

- Developed web application components and UI modules using **JavaScript (ES6+), HTML5, and CSS3** with component-driven architecture — contributed to enterprise-level software development projects within agile sprint cycles.

- Built a complete **Recruitment Management Web Application** — covering job postings, candidate tracking, and review dashboards — integrated REST APIs for real-time data synchronization across all modules.
- Participated in code reviews, requirements analysis, and team collaboration — consistently delivering features on deadline while maintaining code quality and software development best practices.

PROJECTS

Pet Shop Management System [\[GitHub\]](#)

React.js · Node.js · Express.js · MySQL · JavaScript (ES6+) · Tailwind CSS · REST APIs

- Full stack web application for pet shop operations — pet listings, inventory management, customer profiles, and order processing with REST API backend and responsive React.js frontend.
- Built CRUD REST APIs with Node.js and Express.js, normalized MySQL schema for data management, and responsive UI with Tailwind CSS and component-based React architecture.

Bank Management System [\[GitHub\]](#)

Java · MySQL · JDBC · Object-Oriented Programming · Exception Handling

- Full-featured banking application with User Registration, Login, Money Transfer, and Balance Enquiry built using Java, MySQL, and JDBC.
- Applied OOP design patterns, relational database management, and exception handling for secure and reliable transaction processing.

Recruitment Management Application [\[GitHub\]](#)

JavaScript ES6+ · HTML5 · CSS3 · REST APIs · Component-Based Architecture

- Web application for end-to-end recruitment pipeline management — job postings, candidate profiles, application tracking, and hiring reviews.
- Integrated REST APIs with async/await for real-time data sync; automated workflows reducing manual HR effort by 30%.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Dec 2020 – May 2024

Coorg Institute of Technology, Ponnampet — Visvesvaraya Technological University (VTU)

CERTIFICATIONS AND TRAINING

Salesforce Administrator and Developer Certification Training

2024

Besant Technologies, Bangalore, Karnataka — Apex, Lightning Web Components (LWC), Flows, SOQL, CRM Development, Salesforce Platform

KEY ACHIEVEMENTS

- Lead developer of **BillKar** — a live production ERP serving a real business with 500+ daily transactions across invoicing, inventory, and financial ledger modules.
- Delivered **50% error reduction, 35% faster API response, and 30% faster page load** through full stack performance optimization in a production environment.
- Independently built **4 complete full stack and software projects** covering frontend development, backend API development, database management, and deployment.
- Proficient across the **complete software development stack**: React.js, Node.js, Express.js, JavaScript, Java, MySQL, REST APIs, Git — ready to contribute from day one.
