

ISMAIL MAINAL

Java Developer

+91 7899120229 | ismailmanyal3@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Java Developer with 2+ years of professional experience designing and developing backend services, REST APIs, and database-driven applications. Software Developer at Z IT Solutions, Hyderabad — contributed to a large-scale ERP platform applying Core Java (Java 8/11/17+), OOP principles, Java Design Patterns, MVC architecture, and MySQL. Working knowledge of Spring Boot, Spring MVC, Spring Security, Microservices, Hibernate/JPA, JUnit, Docker, and CI/CD pipelines. Proficient in JavaScript (ES6+) and experienced in Agile delivery, code reviews, and cross-functional team collaboration. Strong problem-solver ready to design scalable backend services at Capgemini.

TECHNICAL SKILLS

Languages	Core Java (Java 8/11/17+), JavaScript (ES6+), SQL, Python, Apex
Java & Spring	OOP, Java Design Patterns (Singleton, Factory, MVC, Observer), Collections Framework, Exception Handling, Multithreading, Generics, JDBC, JUnit, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, ORM
Backend & API	RESTful API Design, Microservices Architecture, MVC Architecture, JWT Authentication, RBAC, Input Validation, Error Handling, Node.js, Express.js
Database	MySQL, SQL, PostgreSQL (concepts), NoSQL (concepts), JDBC, Schema Design, Query Optimization, Indexing, ORM / Hibernate
DevOps & Tools	Git, GitHub, Docker (concepts), Kubernetes (concepts), CI/CD — Jenkins, GitHub Actions, Postman, VS Code, Kafka (concepts), RabbitMQ (concepts), Agile/Scrum, Code Review, Debugging

WORK EXPERIENCE

Software Developer

Apr 2024 – Jun 2026

Z IT Solutions — Hyderabad, India

- Developed and maintained backend services for a large-scale **ERP System** serving multiple business clients — applied Core Java (Java 8+), OOP principles, Java Design Patterns (Singleton, Factory, MVC), REST APIs, and MySQL for scalable, maintainable code.
- Designed and built 20+ RESTful API endpoints using layered Spring Boot-style architecture (Controller → Service → Repository) — improving system modularity and reducing integration issues by 40%.
- Implemented JWT-based authentication and Spring Security-style Role-Based Access Control across multiple user roles — reducing unauthorized access incidents and improving system security.
- Optimized MySQL queries through indexing and query refactoring — improved API response time by 35% and reduced critical backend errors by 50% in production.
- Identified and resolved performance bottlenecks in backend services — reduced average query execution time by 45% through strategic indexing and query restructuring.
- Wrote JUnit test cases and participated in Agile sprint planning, code reviews, and technical documentation — consistently delivered on-schedule features with clean, well-documented code.
- Collaborated with frontend, QA, and DevOps teams on feature integration — contributed to CI/CD pipeline reviews (GitHub Actions) and post-release debugging using Git and GitHub.

PROJECTS

Bank Management System [\[GitHub\]](#)

Core Java · MySQL · JDBC · OOP · Design Patterns · JUnit

- Secure banking app with Registration, Login, Money Transfer, and Balance Enquiry using Core Java, MySQL, JDBC, OOP Design Patterns, and JUnit unit tests.
- Applied Collections Framework, JDBC transaction management, and input validation for reliable and secure data operations.

Pet Shop Management System [\[GitHub\]](#)

Java · MySQL · JDBC · REST APIs · MVC Architecture

- Full stack app with pet listings, inventory, and order processing using Java, REST APIs, JDBC, and MySQL — built with MVC architecture and layered service design.
- Integrated REST API endpoints for real-time data operations with full CRUD support and structured exception handling.

Online Examination System [\[GitHub\]](#)

Java · MySQL · SQL · DBMS · OOP · Admin Controls

- Exam platform with test conduct, automated result computation, and admin CRUD using Java OOP, Design Patterns, and relational database design.
- Implemented role-based access for admin and student roles with structured MySQL schema and SQL query optimization.

Food Order Website [\[GitHub\]](#)

Java · MySQL · JDBC · JavaScript · CRUD Operations

- Modular web app with user authentication, product browsing, and food ordering using Java, JavaScript, MySQL, and JDBC.
- Implemented session management, input validation, and error handling for secure and reliable user transactions.

EDUCATION

B.Tech — Computer Science & Engineering

Coorg Institute of Technology (VTU) | Dec 2020 – May 2024
